ICCPI PRESENTS

FORGE PH

THE CROSS-INDUSTRY STARTUP FORUM

YOUR STARTUP. A DAY BEFORE OVERGROUND.

A live environment where promising ventures meet the capabilities, market access, smart capital and financial insight needed to move forward.

MANILA | THURSDAY, OCTOBER 29, 2026 | 9:00 AM

Programme — public-facing concept

THE PROPOSITION

What FORGE Brings to the Market

Many promising ventures do not fail because the idea is weak. They stall because the right combination of evidence, capability, market access, capital and confidence has not yet formed.

MAKE THE VENTURE LEGIBLE

Clarify what exists, what is proven, what is missing and what the next meaningful step should be.

BRING THE RIGHT PEOPLE AROUND IT

Connect founders with relevant investors, corporates, experts, accelerators and institutions.

TURN CONVERSATION INTO ACTION

Use structured working sessions to identify pilots, diligence steps, introductions, capabilities and investment conditions.

FORGE is not another pitch day. It is designed to improve the quality of the next decision.

CROSS-INDUSTRY PARTICIPATION

Who FORGE Is For

FOUNDERS & STARTUPS

From credible early-stage ideas to operating startups seeking growth, capital, capabilities or market access.

INVESTORS & FINANCE

Angels, family offices, VCs, banks and corporate investors looking for better-prepared opportunities.

CORPORATES

Companies offering market access, technology, distribution, pilots, procurement or strategic partnership.

CAPABILITY PROVIDERS

Digital, AI/data, legal, IP, finance, talent, marketing and business-development expertise.

ACCELERATORS & UNIVERSITIES

Pipelines of founders, research, mentors, incubated ventures and entrepreneurial talent.

INSTITUTIONS

Public agencies and ecosystem actors supporting innovation, enterprise development and responsible finance.

Participants are not locked into one role: a company may need one capability while providing another.

PRE-FORUM PREPARATION

FORGE Starts Before October 29

DISCOVERY

Selected ventures are identified through the ICCPI network, partners, universities, accelerators and open outreach.

CONVERSATION

A focused pre-event dialogue clarifies the venture, current stage, evidence, needs and ambitions.

PROJECT PROFILE

Relevant information is structured so investors and capability partners can understand the opportunity efficiently.

PREPARATION

Potential conversations and useful counterparties are identified before the room opens.

The objective is preparation, not certification: FORGE improves clarity without endorsing commercial success.

PROGRAMME · CONTEXT & CAPITAL

Morning — The Conditions for Venture Growth

09:00	**Opening: Why FORGE**	From startup showcase to a working environment for venture progress.
09:25	**Philippine Startup & SME Landscape**	Policy, institutions, innovation pathways and the bridge from startup to scalable enterprise.
10:05	**Smart Capital**	Why finance, technology, market access, talent and relationships can all change a venture's trajectory.
10:45	**From Potential to Financial Readiness**	What investors need to understand; why startup risk remains structurally higher; how better information improves dialogue.
11:25	**Risk, Confidence & Access to Finance**	Investor perspective, risk intelligence and the possible role of risk-sharing mechanisms in mobilising capital.

Potential voices: ICCPI · Philippine institutions · investors · banks · founders · risk-intelligence partner.

COMMERCIAL FRAMEWORK

Capital Is Only One Part of the Equation

SMART CAPITAL

Financial capital plus expertise, technology, market access and relationships.

RISK INTELLIGENCE

Better structured information and risk dialogue can help investors understand what is known, unknown and still to be demonstrated.

RISK SHARING

Where appropriate and legally structured, a separate third party may in future share a defined portion of eligible financing risk.

FORGE does not guarantee investment and does not remove investor judgment. It creates a better environment in which risk, capability and opportunity can be discussed.

ILLUSTRATIVE PARTNERSHIP OPPORTUNITY

A Role for Risk Intelligence

A risk-intelligence platform can add value without becoming the investor or the guarantor.

BEFORE

Help identify the information that makes early-stage and operating startups easier to assess.

IN THE ROOM

Join structured dialogue around evidence, risk factors, milestones and investor questions.

AFTER

Observe how selected ventures evolve and whether stronger evidence or capabilities change financial readiness.

Possible positioning: Venture Readiness & Risk Intelligence Partner — subject to partner agreement.

Afternoon — The Adaptive Startup Workshop

Selected ventures move from presentation to structured working conversations around what they need to progress.

FORM

Bring the venture together with relevant capability, market and capital perspectives.

TEST

Challenge assumptions, evidence, execution gaps and investment conditions.

RECONFIGURE

Introduce a missing capability, partner, market route, milestone or financing path where useful.

NEXT STEP

Agree what happens after the room: pilot, diligence, introduction, development path, investment dialogue — or stop.

The aim is not to force a deal in one day. It is to discover which ventures deserve a credible next step.

FORGE ENVIRONMENT

A Room Designed for Work, Not Only Networking

PROJECT GALLERY

Prepared ventures

FORGE DESK

Routing & facilitation

WORKING TABLES

Venture conversations

DEAL ROOMS

Private next steps

CAPABILITY & CAPITAL NETWORK

People who can add value

RISK & READINESS

Finance / risk dialogue

OUTCOME DESK

Action & follow-up

The visible experience remains simple: understand the venture → bring relevant people together → define the next action.

CONTINUATION

The Forum Does Not End on October 29

FORGE follows what happens after the event because the real outcome is not the meeting — it is what the meeting enables.

D+0 · OUTCOME

Record the agreed next step, owner and timing.

D+10 · ACTIVATION

Did the introduction, pilot, diligence or follow-up actually begin?

D+45 · PROGRESS

What changed? What evidence or capability has been added?

D+90 · CONTINUATION

What deserves to continue, change direction or stop?

OVERGROUND: when a venture has earned a credible path to continue — not simply when it receives funding.

FORGE Is Designed to Learn

FORGE 01 · FORMATION

A first cohort of ventures, investors and capabilities meets, works and produces real next steps.

REAL-WORLD INTERVAL

Projects develop outside the event. Some advance, some change, some stop, and new needs emerge.

FORGE 02 · CONTINUATION

A strong returning core reconvenes, enriched only by the new capabilities required by what emerged.

FORGE 02 is not simply another edition. It starts from the evidence and unfinished work of FORGE 01.

TURNING EVENT ACTIVITY INTO USEFUL CONTINUITY

The Generative Recap

A conventional recap records what happened. FORGE aims to produce a structured, AI-assisted recap that helps participants understand what changed and what may deserve attention next.

CAPTURE

Agreed needs, offers, questions, milestones and next steps — within appropriate consent and confidentiality rules.

STRUCTURE

Organise the event's many interactions into a clearer picture of ventures, capabilities and open questions.

SURFACE POSSIBILITIES

Identify potential connections or consequences for human review; suggestions remain suggestions, not decisions.

RETURN TO PEOPLE

Relevant participants decide what to accept, reject, develop or keep confidential.

AI supports continuity across many participants; commercial and investment decisions remain with people.

TRUST & GOVERNANCE

Clear Roles. Clear Boundaries.

ICCPI / FORGE	Convening, preparation, facilitation and follow-up. No implied endorsement or investment guarantee.
INVESTORS	Independent judgment on investment, pricing, diligence and acceptable risk.
RISK-INTELLIGENCE PARTNER	Information and assessment support; not automatically an investor or guarantor.
RISK-SHARING PROVIDER	A future, separately structured role if a viable legal and financial mechanism is developed.
FOUNDERS & PARTNERS	Retain responsibility for disclosures, decisions, IP and agreements.

Consent-based information sharing · conflicts disclosed · no pay-to-match · no automatic transfer of IP · legal and regulatory review where required.

OCTOBER 29, 2026

FORGE PH — The Public Promise

Bring us what you are trying to build.

Show us what already exists.

Tell us what is missing.

Meet the people who may help move it forward.

Then test what deserves to continue.

Stable process. Open configuration. Real-world evidence.
